When you click on save the leave request shows as Pending and will be emailed directly to your supervisor (s) for approval. The request is automatically available to be viewable and acceptable by the sub if they were to log in to view assignments before the request is approved. When the request is approved your supervisor(s) they can manually send out a sub notification to the qualified subs or a preferred sub noted in the Admin not field of the leave request. OR when the request is put in within two hours of the start time of the shift the notification automatically goes out.

You will receive an email back from your supervisor once the request is approved or denied. If approved the notifications for a sub needed will be sent by email and text message to qualified subs.

You will receive an email when a sub accepts the assignment.

- **Deleting a leave request.** You will need to ask your supervisor to remove a pending request.
